

How Per Angusta Simplifies Remote Management of Procurement Teams

Put Your Focus Where It Counts

Remote working is the new normal. While it's a situation we now face everyday, remote working creates a new set of challenges for teams collaborating across different physical locations. A system designed for decentralized organizations and the leading solution in pipeline management and savings tracking, Per Angusta makes managing remote procurement teams easy.

Benefits

Built by procurement experts, for procurement experts

Focus on pipeline and savings tracking

Seamless project management

Real-time collaboration

Full visibility into procurement projects

Features

Workflows

Per Angusta provides seamless workflows to enable remote project success, such as easy project approvals, risk identification, and auditing.

Communication

With Per Angusta, you can communicate instantly with team members and stake holders, assign tasks to team members, and track live progress updates.

Integrations

Per Angusta integrates with most eSourcing, team messaging, and procurement content providers, joining all tools in one comprehensive solution.
