PER ANGUSTA ENABLES EFFORTLESS PROCUREMENT PERFORMANCE MANAGEMENT

Procurement teams are still tracking savings with spreadsheets.
It's time to say goodbye to spreadsheets!

Per Angusta is created by a former procurement executive to solve buyer-specific challenges and is the agile, innovative solution that meets all procurement needs.

CHALLENGES WITH SPREADSHEET TRACKING

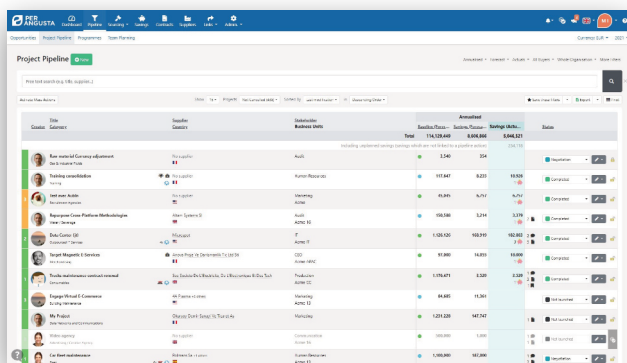

-  No real collaborative capabilities
-  No approval management, communications, or file storage
-  Inaccurate reporting
-  Lack of security
-  Time consuming to chase down data and manually create reports and presentations
-  No insight for synergies or priority management
-  Difficulty reconciling progress with project goals
-  Lack of monthly details on savings projections and actuals
-  Limited or no integrations with other procurement technologies
-  No access to real time data

WHY YOU NEED PER ANGUSTA

-  Easily communicate and collaborate with stakeholders and finance
-  Intuitive, searchable knowledge-sharing capabilities and project approval workflows
-  Enhanced controls eliminate errors in reporting
-  Secure access to all procurement project data with full audit trail
-  Simple automation of rote tasks and processes
-  Significant time savings, leaving more time for strategic goals
-  Direct reconciliation between goals and project progress
-  Customizable dashboards for granular savings tracking
-  Over 30 integrations with industry-leading procurement and sourcing technologies
-  Access to real time data

Our last Customer Satisfaction Survey showed that 2/3 of our customers boost their savings by 5 to 20% by using the same procurement resources

COMPLETE CONTROL OF SOURCING PIPELINE

Procurement professionals often provide added value by **creating a resilient and optimized sourcing pipeline**. It can be difficult to gain a full picture of your sourcing pipeline when using spreadsheets or disconnected tools.

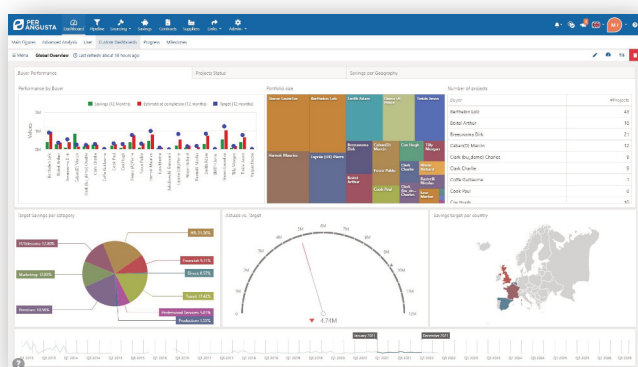

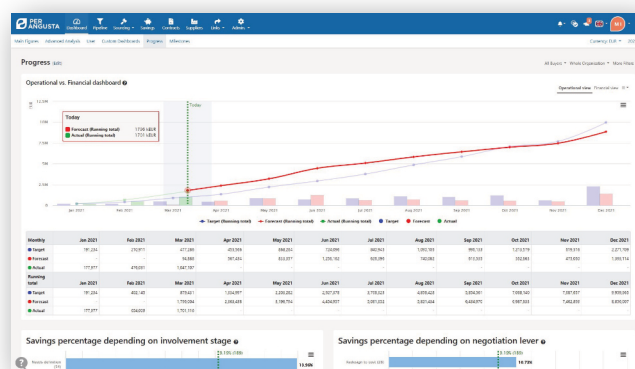

With Per Angusta, you can easily see where spend is being reduced, while gaining a comprehensive picture and enhancing control of that pipeline.

ROBUST REPORTING FOR SAVINGS AND OTHER VALUE ADDS

Procurement provides value in savings, but also far beyond that. Value adds often go unseen by other business functions, making it difficult for procurement to obtain additional budget, staffing, or resources.

Per Angusta tracks all value adds, allowing procurement to clearly demonstrate where optimizations and value are helping to enhance the business and savings are being achieved.

UNMATCHED VISIBILITY AND TRANSPARENCY

Finance often has little insight into the progress being made and procurement has to undergo the time-consuming process of gathering data into spreadsheets.

With Per Angusta, finance and other stakeholders have visibility into all activities and can validate spending with just one click.
